

14th ETCO Congress - Pre-congress Workshop 1

Friday October 14th 2005, 14.00 - 18.00 h, Room E, Palexpo Geneva, Switzerland

EXPANDING THE DONOR POOL WITH NHBD

Aim:

- To familiarize participants with NHBD and to demonstrate the different techniques

Learning objectives:

- How to increase organ supply with NHBD
- How to introduce a NHBD program to your environment
- How to apply NHBD techniques; why perfuse – includes demonstration and practical exercises with puppets and a wet lab
- How to put in practice uncontrolled NHBD
- To determine the financial aspects involved

Workshop format:

This workshop will be run by a pool of International experts and will offer an equal mix of theoretical information, demonstrations, practical exercises and results.
